Who are we?

The Swiss Inventory of Coin Finds (SICF) is an information and documentation center which records and documents the numismatic sources from Switzerland and the Principality of Liechtenstein.

We cooperate with museums, regional archaeological services, and universities.

We represent the «Swiss Coin Find Community» in international networks (nomisma.org, ECFN – European Coin Find Network, e.g.).

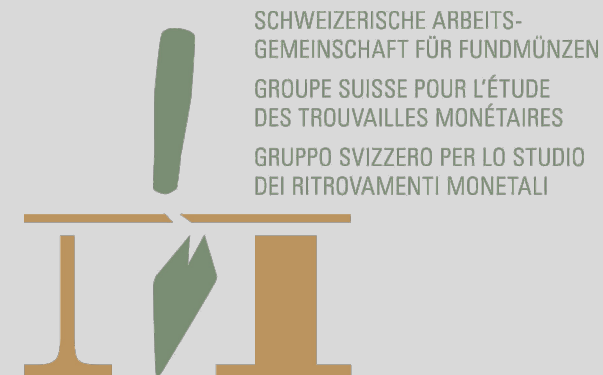

Who are we?

History

1985-
finds

SAF/GSETM - Swiss working group for coin

1992

Foundation of the SICF, as an Institute of the
Swiss Academy of Humanities
Two Offices, in Zurich and in Lausanne

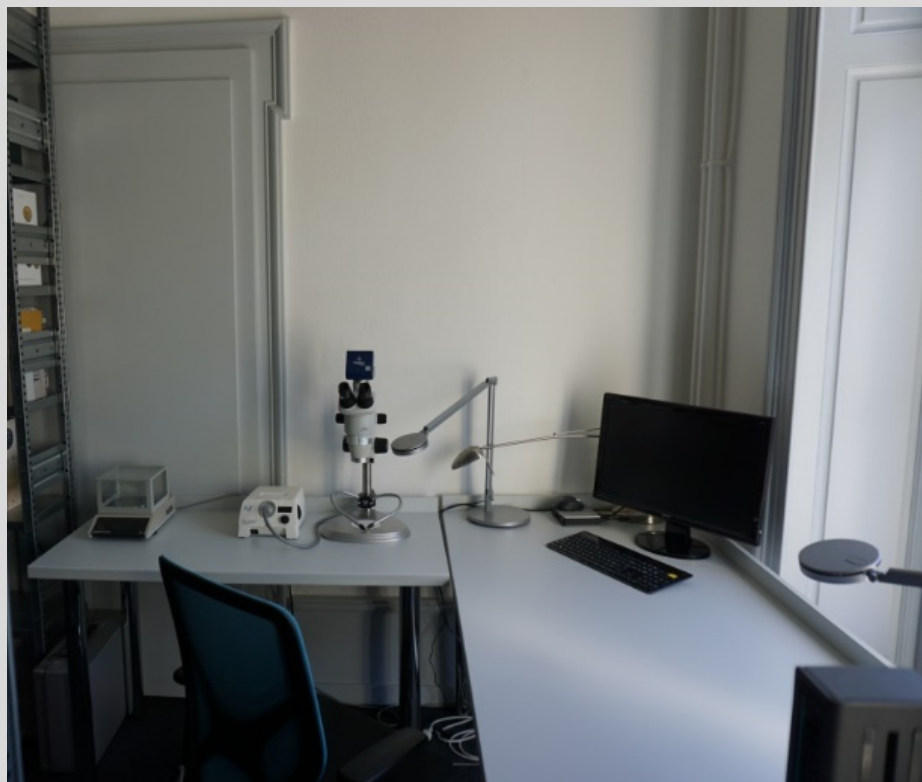

1999

Merging of the two offices into one, in Bern

What is our mission?

Present Data: events and lectures

How do we work?

- ❖ Swiss cantons
- ❖ Museum institutions (eg. Swiss National Museum)
- ❖ Archaeological sites (eg. Augusta Raurica)

The screenshot displays the IFS Fundmünzdatenbank software interface, which is used for managing numismatic data. It consists of several interconnected windows:

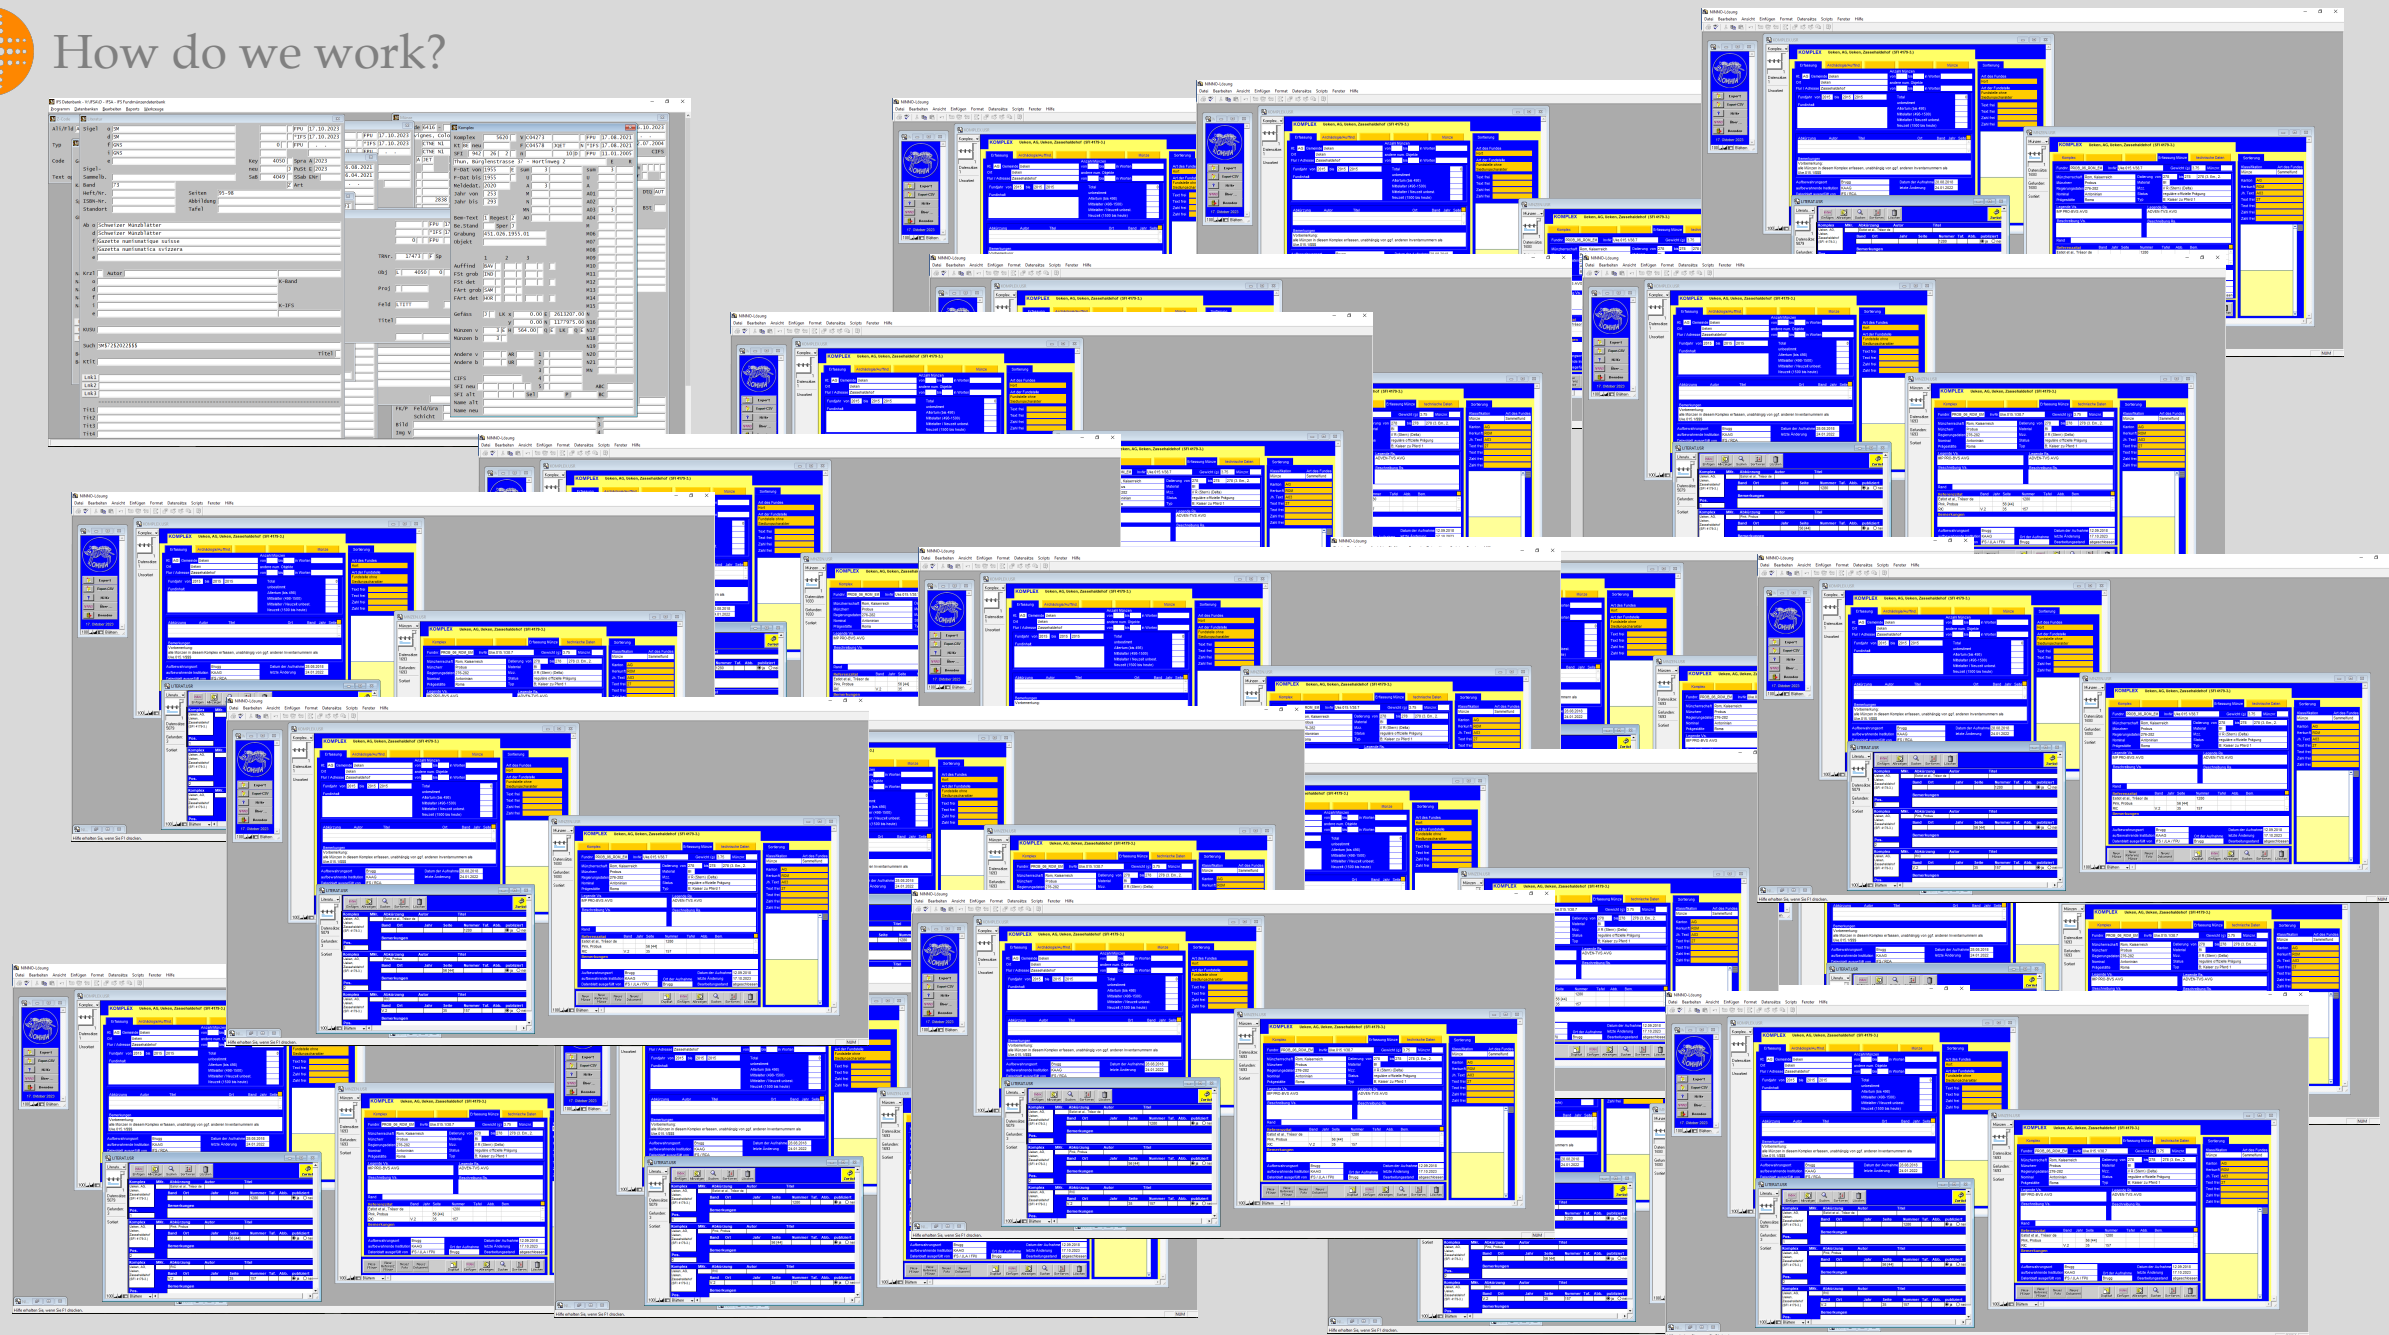

- Literatur (Literature):** This window is used for entering bibliographic information. It includes fields for author (Ali/Fld), title (Titel), and various identifiers like ISBN-Nr. and ISSN-Nr. It also has a search bar (Such) and a list of links (Lnk1, Lnk2, Lnk3).
- Münze (Coin):** This window is for entering specific coin data. It includes fields for material (FPU), weight (G), and date (Jahr). It also has a section for the coin's description (Beschreibung) and a list of links (Lnk1, Lnk2, Lnk3).
- Komplex (Complex):** This window displays a detailed list of coin entries. It includes columns for date (F-Dat), type (Kt), and value (W). It also has a section for the coin's description (Beschreibung) and a list of links (Lnk1, Lnk2, Lnk3).

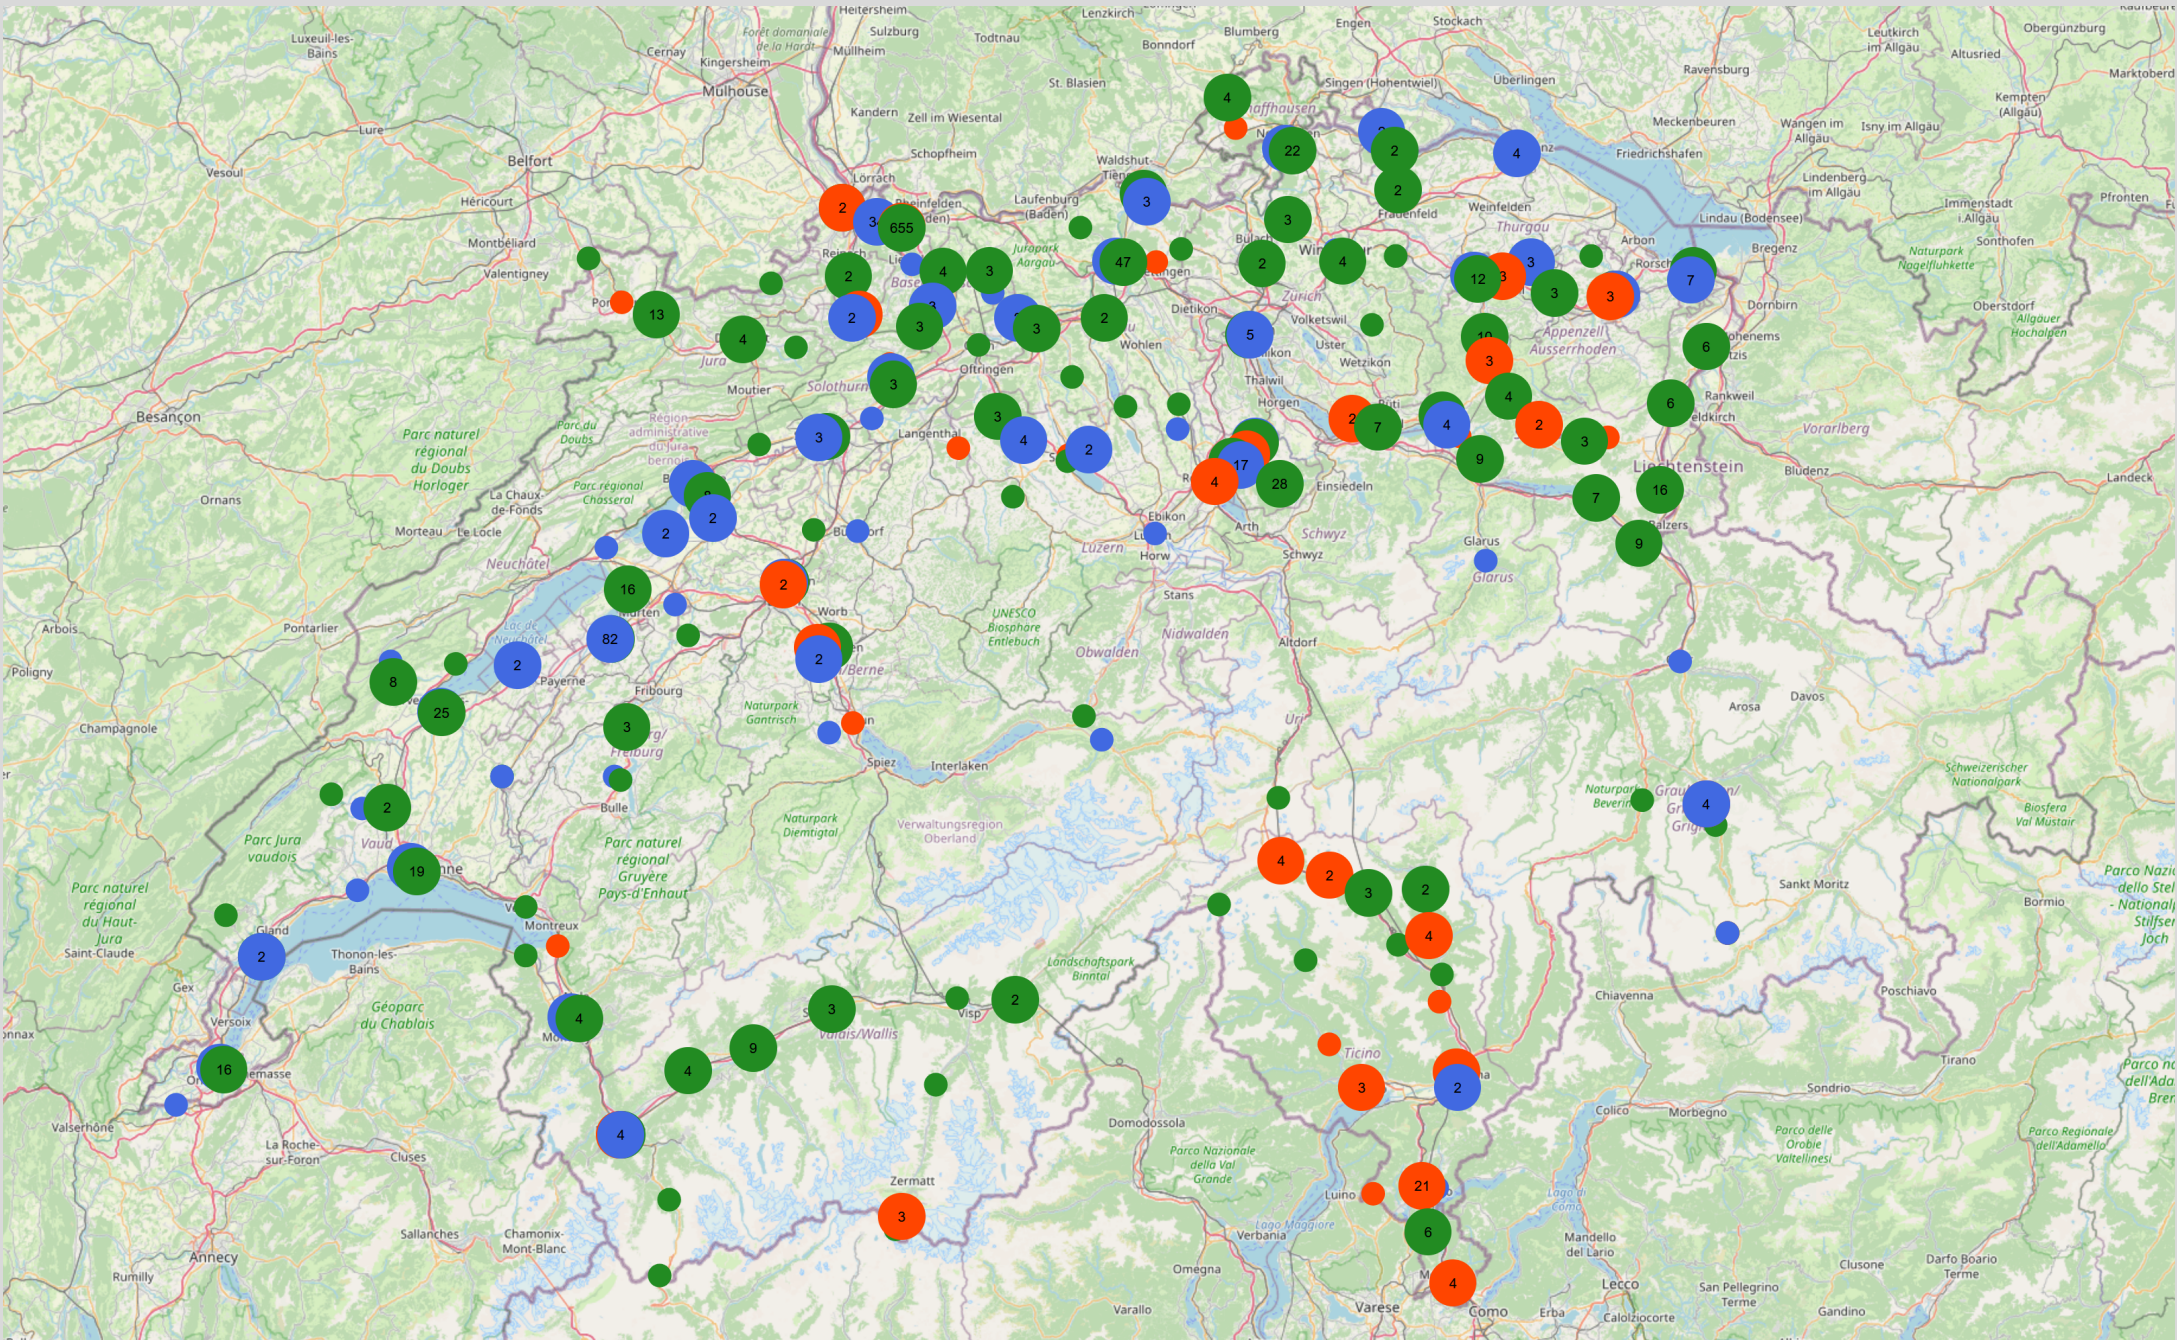

The interface is designed to be user-friendly, with clear labels and a logical layout for entering and managing numismatic data.

What are our needs?

Mission of our new Database:

- ❖ Integration of existing Data

- 40 years of research
- Information on *ca.* 15'000 sites
- Details on *ca.* 150'000 coins

What are our needs?

Mission of our new Database:

- ❖ Integration of existing Data
- ❖ Centralisation of Data
- ❖ Normalisation of Data
- ❖ Interoperability
 - With our local partners
 - With LOD projects: CRRO, OCRE, CHRE, OSCAR,...

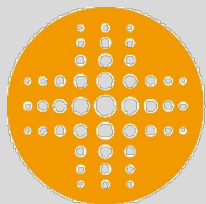

What are our needs?

Mission of our new Database:

- ❖ Integration of existing Data
